OUR VALUE ENABLES YOUR RESULTS:

Firmly grounded in the values of leadership, integrity, and commitment, SNVC is dedicated to providing the program management and IT solutions needed to succeed. Our independent verification and validation (IV&V) methods and our project controls focus on optimizing our clients' performance, cost, and schedule requirements while minimizing project risk. Our technical solutions help to ensure the network security and operational availability that our customers have come to rely on everyday. The value that we bring in our experienced and highly skilled workforce enables the results that improve communication and collaboration, ensures the integrity of information systems and networks, and increases the overall mission efficiency and effectiveness. Consequently, the combined quality of our services and solutions deliver measurable project savings and cost avoidance to each project that we tackle. Our team enables our customers to work smarter, faster, and more responsively — delivering the results that ensure success.

CORE **SERVICE** OFFERINGS

Program Management Services:

At SNVC, we believe program management is a partnership with our clients. Leading the effort is a Project Manager (PM) with the experience, expertise, and decision~making authority needed to meet your project objectives. Our PMs incorporate a skilled team of professionals, a tailorable and proven lifecycle management methodology, and industry best practices, all of which when combined deliver measurable savings to each project. Our areas of expertise include:

- Program Support
- Requirements Traceability / Validation
- Financial Management / Documentation
- Earned Value Management
- IV&V
- Testing Support
- Information Assurance
- QA Management Systems
- GIS Program / Policy / Governance
